

## PRACTICAL : 04

**Aim:** To perform the user's view analysis for the system: Prepare Use case Diagram.

**Project:** “ Student Fees Management ”

- This Use Case diagram consist of two actors:
  - 1) Admin
  - 2) Student

### 1) Admin :

Something with a Behavior or role, e.g., person, another system, organization. Admin is the one who handled the backend side of the Software. Admin is connected to the Login. Admin is consult with the managing the students details, managing fees details and track transaction

managing the payment activity, etc. Admin can also handled the all the estimation reports of the student fees management system.

## **2) Student :**

A use case diagram at its simplest is a representation of a student's interaction with the system that shows the relationship between the student and the different use cases in which the user is involved. Student are those who uses the software. For the newly student it is mandatory to do registration and can directly accessed their accounts by login to it. Student can view details, make payment, generate receipt, etc. Using this system student can pay secure payment.
